2530 RESOURCE MATERIALS

The Board of Education shall provide resource materials to implement district and school educational goals and objectives as student needs dictate and district resources permit. Such materials include reference books, other supplementary titles, maps, library print and non-print materials, and other sources of information for use by students that are not designated as textbooks.

The Superintendent or designee shall be responsible for the selection and maintenance of all resource materials, in accordance with the following standards:

1. Material will be suited to the varied interests, abilities, reading levels, and maturation levels of the students to be served;
2. Wherever possible, materials will provide major opposing views on controversial issues so that students may develop under guidance the practice of critical reading and thinking;
3. Wherever possible, materials will represent the many religious, ethnic, and cultural groups and their contribution to American heritage;
4. Materials will be factually accurate and of genuine literary or artistic value;
5. Materials will be of a quality and durability appropriate to their intended uses and longevity;
6. Materials will relate to, support, and enrich the courses of study adopted by the Board.

The Superintendent will develop regulations for the selection of resource materials that provide for the effective consultation of teaching staff members at all appropriate levels; ensure that the Board's budgetary allotment for resource materials is efficiently spent and wisely distributed throughout the instructional program and the district; and ensure an inventory of resource materials that is well balanced and well rounded in coverage of subject, types of materials, and variety of content.

The Superintendent will evaluate the continuing effectiveness and utility of resource materials and recommend to the Board the removal of those materials that no longer meet the standards set forth in this policy. Any request for the removal of resource materials will be governed by Policy No. 9130 on public complaints.

A. Definition

“Resource materials” are all those sources of information for the use of students that have not been designated as textbooks and generally must be shared by individual students. Resource materials include reference books, fiction and nonfiction books, maps, audio and audio-visual materials, CD ROM’s, pamphlets, periodicals, pictures and on-line references. Resource materials may be maintained in classroom library collections and/or in the school library or media center.

B. Selection Process

1. The librarian/media specialist in each school building will accept the written requests of teaching staff members for new and revised reference materials. Each request should include the:
 - a. Name and originator of the work,
 - b. Its publisher or distributor,
 - c. A brief description of the material, and
 - d. The reason for the request, including the relevance of the material to the instructional program.
2. All recommendations will be forwarded to the librarian/media specialist for consideration. The librarian/media specialist will attempt to review each requested work or, alternatively, to consult with other educational institutions that have used the material.
3. The librarian/media specialist may consult such selection aids as booklists, school library journals, previews, school library catalogs, and subject bibliographies prepared by specialists in the field.
4. The librarian/media specialist will measure each recommendation against the standards for selection (see paragraph C) and the amount budgeted for resource materials in the current or succeeding school year, as appropriate.
5. The Principal will present to the Superintendent a list of recommended purchases, no later than July each year. The list will include multiple copies of material for which a high level of interest and need is anticipated.
